WORK EXPERIENCE

QualityLogic - February 2020 – Present

Boise, Idaho / Remote
QA Engineer - Dec. 2021 - Present

- Responsible for creating and maintaining automation tests for websites
- Responsible for creating and maintaining CI/CD pipelines for the automation tests
- Utilized Playwright and Cypress to create UI based automation tests
- Utilized Pytest and NUnit to create API based automation tests
- Utilized K6 to create performance and load tests
- Utilized Detox to create automation tests for mobile apps
- Utilized Github Actions and Azure Devops for creating CI/CD pipelines
- Responsible for creating bug tickets based off of failures found through automation tests
- Maintained automation code through Page Object Model format to ensure selectors were abstracted in a nice re-usable manner
- Utilized parallelization and prioritization to increase performance and utility of CI/CD pipelines for automation tests

Test Technician - Feb. 2020 - Dec. 2021

- Responsible for creating and maintaining test cases
- Exploratory testing of websites
- Manually tested websites according to test cases
- Utilized Jira for creating bug tickets based on issues found in both exploratory testing and regular testing through test cases
- Utilized Zephyr and Testrail for creating, managing, and maintaining test cases
