

Grant Ponting

951-813-8068 • grantponting@proton.me • <https://grantponting.com/>

Software Developer

Software engineer with 4+ years of experience building Python applications, web services, and developer tooling across enterprise and startup environments. Skilled in full-stack development, CI/CD systems, and scalable software design.

WORK EXPERIENCE

QualityLogic • Boise, Idaho / Remote • 02/2020 - Present

QA Automation Engineer/SDET

- Delivered quality engineering and test automation solutions for clients spanning enterprise real estate, state government ERP modernization, and mobile fitness applications.
- Developed and maintained UI, API, mobile, and performance automation frameworks using Playwright, Cypress, Pytest, Detox, and K6.
- Built and optimized CI/CD pipelines with GitHub Actions and Azure DevOps, enabling reliable automated testing across web and mobile platforms.
- Led migration of 1,000+ automated tests from Cypress to Playwright and designed reusable framework architecture that improved maintainability and reduced code duplication.
- Engineered parallelized test execution strategies that reduced runtime by 50%+ and enabled execution of 500+ end-to-end tests in under seven minutes.
- Developed Python-based tooling for large-scale UAT standardization initiatives and explored AI-assisted validation techniques for non-deterministic application behavior.
- Mentored 15+ engineers and acted as a technical liaison for client engagements.

Test Technician

- Conducted manual and exploratory testing, authored structured test cases, and collaborated with QA/dev teams to identify automation opportunities

Freelance Work • 08/2025 - Present

Software Developer

- Designed and developed full-stack web applications using React, Vite, Astro, Hono, htmx, and Tailwind, focusing on modular architecture and maintainable system design.
- Built and deployed edge-hosted applications on Cloudflare, integrating Cloudflare D1 for serverless data persistence.
- Implemented CI/CD pipelines with GitHub Actions to automate builds, testing, and deployments.
- Developed production websites with a focus on performance, responsiveness, and extensibility using modern frontend and backend patterns.
- Example Site: *CanyonLight Photography* — <https://rephotosbyadina.com/>

SKILLS

Coding, Software Development, UI testing, API testing, Load testing, Performance testing

WEB DEV EXPERIENCE:

Astro, htmx, Cloudflare D1, React, Django, MySQL, Hono, Cloudflare

Programming Languages:

Javascript, Python, Yaml, C#, CSS, HTML, Typescript

Testing Frameworks:

Playwright, Cypress, Pytest, NUnit, Detox, K6

QA Tools:

Jira, Zephyr, TestRail, Allure

Devops:

Github Actions, Azure Devops, Git

EDUCATION

General Courses completed for Computer Science Degree

Utah State University
Logan, Utah
01/2017 - 01/2019

High School Diploma

Murrieta Valley High School
Murrieta, CA
01/2013 - 01/2017
